We are looking for a 1 x Relay board. Wi-fi, Bluetooth - ESP32

Wifi smart switch with potential free contacts, to control electrical appliances such as lights and devices.

- Wi-Fi-operated smart switch
- 1 channel 8 A or higher
- Supports up to 8 A at 240 VAC
- Dry contacts (potential-free) - Use it to control a wide range of devices and appliances.
- screw terminals

Power: 110 - 240 VAC
Relay: Dry, NO contact, 1-pole, μ contact
External Protection:

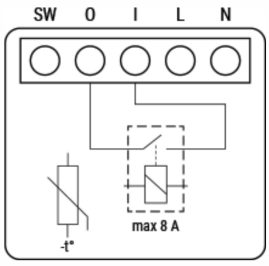

- 10 A, tripping characteristic B or C,
- 6 kA interrupting rating,
- Energy limiting class 3

Max switching voltage AC:240 V
Max switching current AC:8A
Max switching power AC:2000 W
Internal-temperature sensor:Yes

SOC/CPU - ESP32-S3 or ESP32-C3 ? [Please share recommended part no before starting]

General Purpose Button input - Reset & Programming
LED for indication
onboard Pcb trace Antenna
Programming Header
Use components from JLCPCB where possible

Size (HxWxD): 29x35x16 or similar estimate

Device electrical interfaces

Inputs

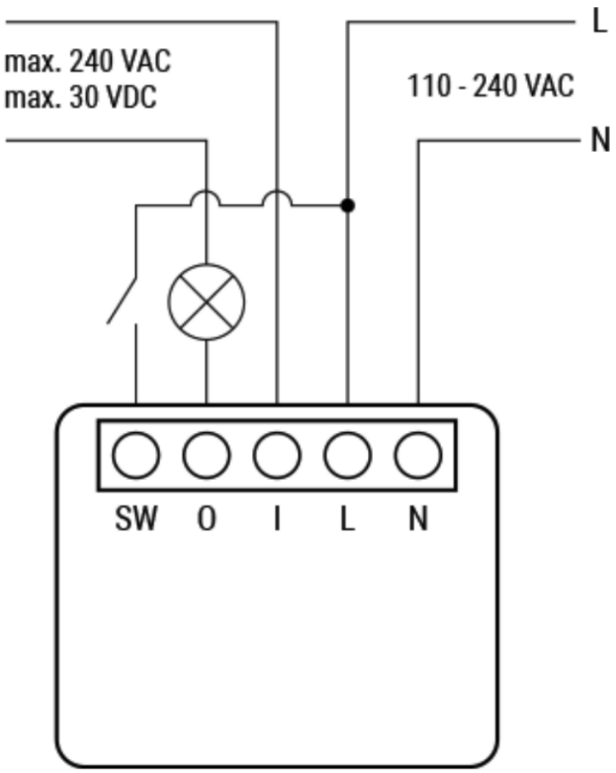

- 1 switch/button input on screw terminal
- 1 potential-free contacts relay input on screw terminal
- 2 power supply inputs on screw terminals: N and L

Outputs

- 1 potential-free contacts relay output on screw terminal

Basic wiring diagrams

Legend

Terminals		Cables	
SW	Switch (controlling O) input terminal	**L**	Live (110 - 240 VAC) cable
O	Load circuit output terminal	**N**	Neutral cable
I	Load circuit input terminal		
L	Live (110-240 V) terminal		
N	Neutral terminal
